PROFESSIONAL SUMMARY

Cloud, DevOps, and Solution Architecture professional with 7+ years of experience delivering secure, scalable, and high-availability enterprise IT solutions. Strong hands-on expertise in Azure, AWS, Kubernetes (CKA), CI/CD automation, Linux/Windows systems, virtualization, and cloud networking, with proven success in cloud migration, platform modernization, security governance, and IT operations.

CORE SKILLS

- Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS), Huawei Cloud
- Containers & Platform Engineering: Kubernetes, Docker, container orchestration, autoscaling
- DevOps & CI/CD Automation: GitHub Actions, CI/CD pipelines, release orchestration
- Solution & Enterprise Architecture: Cloud & hybrid architecture, high availability, disaster recovery
- Systems & Infrastructure: Linux, Windows Server, VMware, Hyper-V, storage, backup, virtualization
- Security & Identity: Entra ID, Active Directory, IAM, Microsoft Defender, Intune, Conditional Access
- Monitoring & IT Operations: Monitoring, logging, alerting, incident, performance optimization

PROFESSIONAL EXPERIENCE

Solution Architect – Enterprise Business | ADN Technologies Limited (Oct 2024 – Present)

- Lead end-to-end cloud and hybrid architecture design on Azure and AWS.
- Design CI/CD automation using GitHub Actions and DevOps best practices.
- Drive cloud migration, optimization, and high-availability initiatives.
- Act as technical authority for enterprise and banking sector projects.
- Implement SCM governance using GitHub Enterprise Server and Entra ID.
- Define DevOps-ready infrastructure patterns and standards.
- Coordinate delivery teams, stakeholders, and technology partners.

System Engineer – Cloud Infrastructure | Corporate Projukti Limited (Jan 2023 – Sep 2024)

- Designed and operated scalable cloud environments on Azure and Huawei Cloud.
- Led migration of applications and databases from on-prem and AWS.
- Implemented disaster recovery using Azure Site Recovery.
- Administered Linux systems, storage, and networking.

- Managed monitoring, alerting, and SLA compliance.
- Optimized cloud cost and performance.
- Supported architecture decisions through operational insights.

Executive – Information Technology | Nassa Group (Jul 2018 – Jun 2020)

- Managed enterprise IT operations and system availability.
- Supported server infrastructure, endpoints, and applications.
- Coordinated external vendors and incident resolution.
- Led OS deployment and hardware standardization.
- Monitored network and application performance.
- Supported IT governance and infrastructure planning.

Executive – Information Technology | Micro Fibre Group (May 2016 – Jun 2018)

- Supported daily IT operations and infrastructure services.
- Installed and maintained OS, hardware, and network devices.
- Provided cross-department technical support.
- Managed OS provisioning and software deployment.
- Improved stability through incident management.
- Assisted LAN configuration and monitoring.

KEY PROJECTS

- Secure GitHub Enterprise Server Infrastructure & Local Identity Integration
- Implementation and Optimization of Kubernetes Autoscaling for Microservices Architecture
- Cloud Platform Implementation and Go-Live Project
- Cloud Migration and Performance Enhancement Project
- Email Infrastructure Modernization — Zimbra to Microsoft 365 Migration
- Enterprise Network Access Control (NAC) Implementation & Monitoring
- Enterprise Endpoint Security and Compliance Deployment using Microsoft Intune & Defender

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert
- Microsoft Certified: DevOps Engineer Expert
- Certified Kubernetes Administrator (CKA)
- Microsoft Certified: Cybersecurity Architect Expert
- Microsoft 365 Certified: Administrator Expert
- GitHub Actions Certified
- Microsoft Certified: Windows Server Hybrid Administrator Associate

EDUCATION

Master of Science in Information Technology – Jahangirnagar University, Bangladesh
